

Lunar Lander - Planning

Nellie Olsson Wennberg

Avoid (in sideways)

Birds
Asteroids

If possible?

Purpose

Fly to the moon and perform a safe landing.
Can you figure out how to land the spacecraft?

Rules

- click to start the game
- move left and right with arrows
- rotate with spacebutton
- slow down speed with arrow down → adds velocity
- Add speed with arrow up → velocity
- game ends if you pass by the moon or crash into the moon without rotating and not on the "flattest surface"(between certain x and y values)
